

# BEETRONICS Overhive (Medium Gain Overdrive)

## Unique Selling Points

- Medium gain overdrive with round and warm tone
- Reacts very dynamically to your playing style
- "Body" switch lets you adapt tone depending on instrument (single-coil/humbucker)
- Multiple parameters for versatile sound-shaping
- 100% handmade – every pedal-design looks slightly different

## Features

- Versatile medium gain overdrive
- Round and warm tone
- Dynamically reacting to your playing – your hands dictate the breakup
- "Body" switch activates low end boost e.g. when switching guitars
- "Hive" switch makes you sound bigger and fatter or tighter and thinner
- "Honey" controls the gain-setting from smooth crunch to dynamic drive
- Tone Control and Master Volume
- Dimensions: 13.8 x 9.6 x 7 cm
- Weight: 0.7 kg
- True Bypass Design
- Hand made in the USA

## Product Description

The Overhive is an extremely versatile medium gain overdrive. Its round and warm tone respects your amp, enhancing its best qualities while dynamically reacting to your playing. The controls give you nearly infinite possibilities. While the "Body" switch is great for when you are switching guitars on a set or just feel like adding a low end boost, the "Hive" switch can make you sound bigger and fatter, or tighter and thinner.

The "Honey" control just adds the sugar. Roll it down for a nice and smooth crunch, or roll it up for a smooth and dynamic drive, where your hands dictate the breakup. You also got a tone control and master volume.

With so many possibilities, it's hard to not find a place for it on your board. It's truly a hive of sweet tones.

Hand made in California.
